

Elevated ideas.

Whether you work for

...a Museum or Science Center

...a company that designs and produces exhibits

...or a company that produces exhibit support materials

Molly Ward, M.S. Science Education

Top Goat at Mountain Goat Instructional Design can help you exceed your goals for quality and sales!

With over 15 years of experience in Science Education, including six years as a Museum Educator, I know what K-12 educators are looking for and what educational components are critical for museum exhibits to provide.

If you represent an **Exhibit Vendor** I can:

- Help increase the educational value of your exhibit, making it more enticing to venues based on school visitation potential.

If you represent an **Exhibit Venue** (Museum or Science Center):

- Help increase visitation by school groups by evaluating and improving the educational value of your permanent and/or temporary exhibits.

If your company provides **Exhibit Support** I can:

- Evaluate, research and develop high-quality customized STEM content for your unique interactive pieces.

I specialize in science-related content and provide services such as:

- STEM content research and writing
- Docent training materials
- In-exhibit interactives
- Pre-, during- and post- visit materials for K-12 teachers, as well as Educator Guides
- Design of educational tours
- Next Generation Science Standards alignment
- Instructional Design for high-tech and hands-on teaching and learning

If your end goal is to increase your sales, exhibit rentals or visitation, please consider a consultation with Mountain Goat Instructional Design.

Learn how Molly's skills and creativity can benefit your next project.
